ITEM DISCUSSED	ACTION BY WHOM / WHEN	UPDATE
<p>Minutes from Last Meeting – Checked for accuracy and true reflection All agreed Signed off</p>		
<p>Alison Smith gave verbal presentation on Future Fit Process and Consultation</p>		
<p>All present were given opportunity to ask questions</p> <p>NB: as question were personal and individual these shall not be recorded here</p>		
<p>GW – asked whether WMP has an AED (De-Fib) And if so why this is not signed so the public ear aware in case of emergency outside in the community</p> <p>To advise – All GP Surgeries in England have a clinical model AED. WMP’s is stored in an accessible location and signed at point of location. All staff are aware of its location and all clinical staff are trained in its use. Should an emergency occur in the vicinity of WMP (while open and suitably staffed) then WMP could help support, but this is not a community public access service.</p> <p>In terms of Community Based Public Access AEDs these are a different category and different service. Locally The park Lane Centre raised funds recently to purchase and locate a Community, Public Access AED – which is located and signed in their facility.</p> <p>Having checked further we also understand that The Dentist based at The Park Lane Centre are also clinically required to have one.</p> <p>Suggestion - perhaps if WMP PPG felt strongly that they would like to see a full public access AED – that could be accessible 24/7 365 – such as those located on other community highstreets and which are independent of any organisation which needs to be ‘open’ to access, they could conduct some research into requirements and fundraising opportunities?</p>
